Speed & Access Choices

PowerNet Global Communications offers an expanding portfolio of IP-based products and services that will enable your company to leverage the Internet and new Web-based technologies to enhance your business capabilities for both businesses and their end users. Our services are expertly engineered and managed to provide industry-leading network reliability, quality, and scalability - consistently delivering the performance you desire.

PowerNet Global's Dedicated Internet Access Service offers a variety of bandwidth increments, access methods, and billing options that can be customized for solutions to meet your company's unique needs. PowerNet Global places the highest focus on your customer experience and satisfaction. Superior quality, performance and speed are fundamental to the service provided by PowerNet Global.

PowerNet's Leading SLA

PowerNet is dedicated to providing and maintaining high network reliability and availability for your company on a global scale - and this commitment is backed by a strong Service Level Agreement (SLA) guarantee. PowerNet's advanced infrastructure is designed to provide maximum reliability, guaranteed QoS and quick provisioning.

Flexible Bandwidth Options

PowerNet's Dedicated Internet Access can be provisioned at speeds of DS-1 through OC-48. In addition, burstable options FastE and GigE connectivity are also available. Our services are highly scalable to provide a range of capacity allowing your company to choose the bandwidth you need.

Proactive Customer Care

PowerNet's Customer Care center is staffed 24x7 by highly skilled technicians to ensure the network performs as designed. This includes monitoring every aspect of your service, from trouble notifications to identification of problems and assistance with preventive measures.
